Lab3- Genome Assembly find Shortest string using Euler Cycle for SBH

- **Task:** Implement Euler cycle De-Bruijn approach to solve shortest string problem. It must be optimal but can have multiple solutions.

- **Input:** One should be able to feed in a text file with sequences e.g. ACG, CGA, CGC, … each in different line.

- **Output:** One or more final string

- **Submission:** Show code and step by step process.

- 2 weeks time

Thank You
